

SYDNEY TIMBER SUPPLY

Untreated Pine Framing

Untreated structural pine, MGP10

GRADE
MGP10 structural

TREATMENT
Untreated

USE
Internal, protected
framing only

ORIGIN
Plantation grown,
responsibly sourced

SIZES
90 × 35, 90 × 45 mm

SOLD
Per board, set lengths

SUPPORTED APPLICATIONS

Stud walls, internal partitions, noggings, blocking and general internal carpentry.

An Australian-grown hardwood species, milled by our supplier. Species origin and durability are stated as published in the supplier specification sheets held on file by Sydney Timber Supply.

01 Technical information

Species	Plantation pine
Grade	MGP10 (machine graded and tested to Australian Standards)
Treatment	Untreated
Use limitation	Untreated pine has a short service life if exposed to weather or ground; supplied strictly for dry, protected internal framing
Sourcing	Responsibly sourced from sustainably grown plantation timbers (supplier statement)
Nominal sizes	90 × 35 mm and 90 × 45 mm framing
Selling unit	Per board in set lengths; the price for each length derives from a single per-metre rate

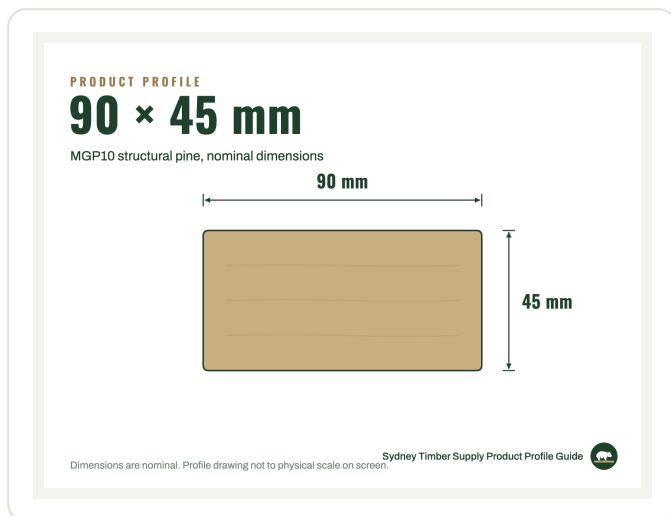

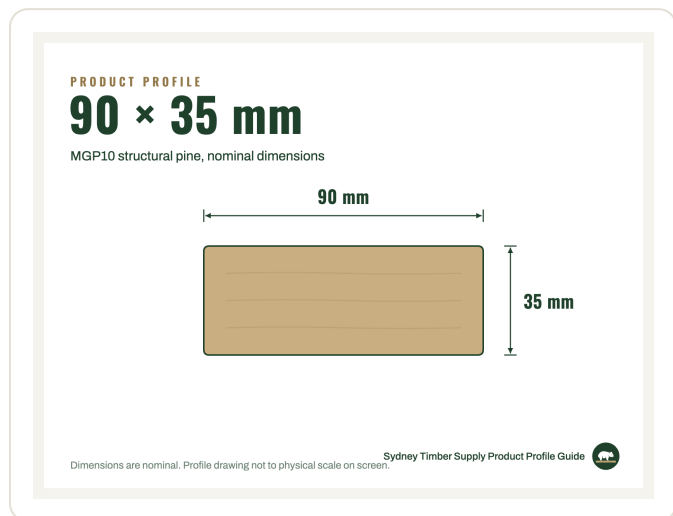

02 Product overview

Untreated MGP10 pine is the standard stick for internal, weather-protected building work: stud walls, partitions, noggings, blocking and general carpentry framing where the timber stays dry and out of ground contact for the life of the structure.

Because untreated pine has a short service life if exposed to the weather or ground, it is supplied specifically for internal, protected framing rather than any exposed or ground-contact use.

03 Profile and dimensions

04 Ordering

Pricing	Priced per board in the set lengths shown on the product page. Each length is priced from the same per-metre rate.
Lengths	Supplied in set board lengths. Lengths not listed on the product page can be requested by quote.
Packs and trade	Pack and bulk quantities are quoted against current supplier availability.
Pickup and delivery	Pickup from West Gosford NSW. Delivery is quoted per order based on load size, board length and site access.

05 Installation and handling

- Store framing flat, fully supported and dry before use.
- Machine graded structural pine is used in accordance with the relevant framing standards and project engineering; fix per standard framing practice.

06 Care and maintenance

- Store framing flat, fully supported and dry before and during use.
- Untreated pine carries no preservative treatment and is supplied for dry, internal framing; confirm suitability for your application before ordering.

07 Source and disclaimer

Technical information has been compiled from supplier documentation provided to Sydney Timber Supply. Product availability, colour and individual board characteristics may vary. This sheet is general product information, not a structural certification; confirm critical requirements at order stage.
